# **Product Description**

BÖHLER K890 MICROCLEAN – This powder-metallurgical cold-working steel has good toughness, very good compressive strength, and excellent fatigue strength.

# **Properties**

- > Toughness & Ductility: very high
- > Good toughness means safety against cracking of the molds in use: very high
- > Uniformly high strength and toughness, even with large dimensions: very high
- > Wear Resistance: good
- > Compressive strength: high
- > Dimensional stability: very high
- > Excellent homogeneity and isotropy: very high
- > Fine carbide structure: very high
- > Homogeneous microstructure: very high

# **Applications**

- > Machine knife (for producers)
- > Coining
- > General Components for Mechanical Engineering
- > Fine Blanking, Stamping, Blanking

- > Rolling
- > Powder Pressing
- Components for Recycling Industry
- > Cold Forming
- > Wear parts
- > Pill punching dies

------------------------------------	---

## **Tempering chart**

#### Tempering:

Hardening temperature:
• • • 1070°C/1960°F
----- 1100°C/2030°F
---- 1150°C/2100°F

Slow heating to tempering temperature immediately after hardening.

Dwell time in the oven 1 hour per 20 mm workpiece thickness, but at least 2 hours.

Slow cooling to room temperature after each tempering step is recommended.

Tempering at 540-570  $^{\circ}\text{C}$  at least three times is recommended.

Please refer to the tempering diagram for guide values for the achievable hardness after tempering. Tempering for stress relieving 30 to 50°C below the highest tempering temperature.
